## **DVT10T2 Firmware Release Note**

E20181002

---

---

### Firmware Release Note

Release Note Date : 2018/10/2  
Release Note No : BIOS E20181002  
Applicable Products : DVT10T2 with ERIC10TB2 controller

---

---

Version : pek110f (changed from pek110b), filename: pek110f.8831

Level : Recommended (for all shipped products)

Critical Note: This new firmware is 110f. If existing firmware is older than 110, The new firmware has a different architecture from older versions. The new version has file names as pekxxxx instead of pedxxxx. The transition from pedxxxx to pekxxxx requires an intermediate firmware upgrade before applying new pekxxxx firmware. The intermediate firmware name is [ped2pek.cod](#). Use ped2pek.cod on firmware upgrade first before upgrade to pekxxxx. **Due to architecture change, data integrity will be lost. If data inside the storage is important, please back it up before upgrade. DATA will be corrupted after firmware upgrade, and the disk LUN must be formatted as new after then.**

#### Contents of Change
